

Wander through Wildflowers

Shenandoah Mountain is rich in diverse plant life. These are just a few May blooming flowers of over 2000 species of herbaceous plants in the George Washington & Jefferson National Forest. For more flowers, go to the free app: www.iNaturalist.org, Virginia Native Plants project, and www.fs.fed.us - Celebrating Wildflowers.

Wild Geranium

Watch the Warblers

Shenandoah Mountain is a global biodiversity hotspot, with over 300 species of birds (recorded in Augusta County). There are many more spring migrating warblers, and a whole other group in the fall. To learn more, go online to the free apps: www.Merlin.allaboutbirds.org (for bird identification) and www.eBird.org (for sightings and data)
